ZARA

Customer and sales performance

Problem Statement 3 (Power BI) | For: Chief Commercial Officer

The five dashboard pages and what each one shows | Anmol Agarwal, Business Analyst

Screenshots taken with Year = 2024 and all other slicers cleared. Data simulated for teaching.

03

POWER BI / CHIEF COMMERCIAL OFFICER

How might we help first-time customers find a reason to come back, so that more of them buy again within 90 days?

SITUATION

Zara has almost 600,000 identified customers, but the commercial team reports only total sales.

COMPLICATION

Net sales grew just 1.3% in 2024 while active customers grew 19.3%, so revenue per customer fell from $190 to $161. Half of all customers (51%) have bought only once.

QUESTION

Who are our customers, do first-time customers come back, and how do we make more of them return?

PROBLEM STATEMENT

The Chief Commercial Officer is facing many first-time customers who never buy again while trying to grow sales, which results in marketing spend that does not build a loyal base.

How the dashboard answers the brief

Five pages, each followed by its insights

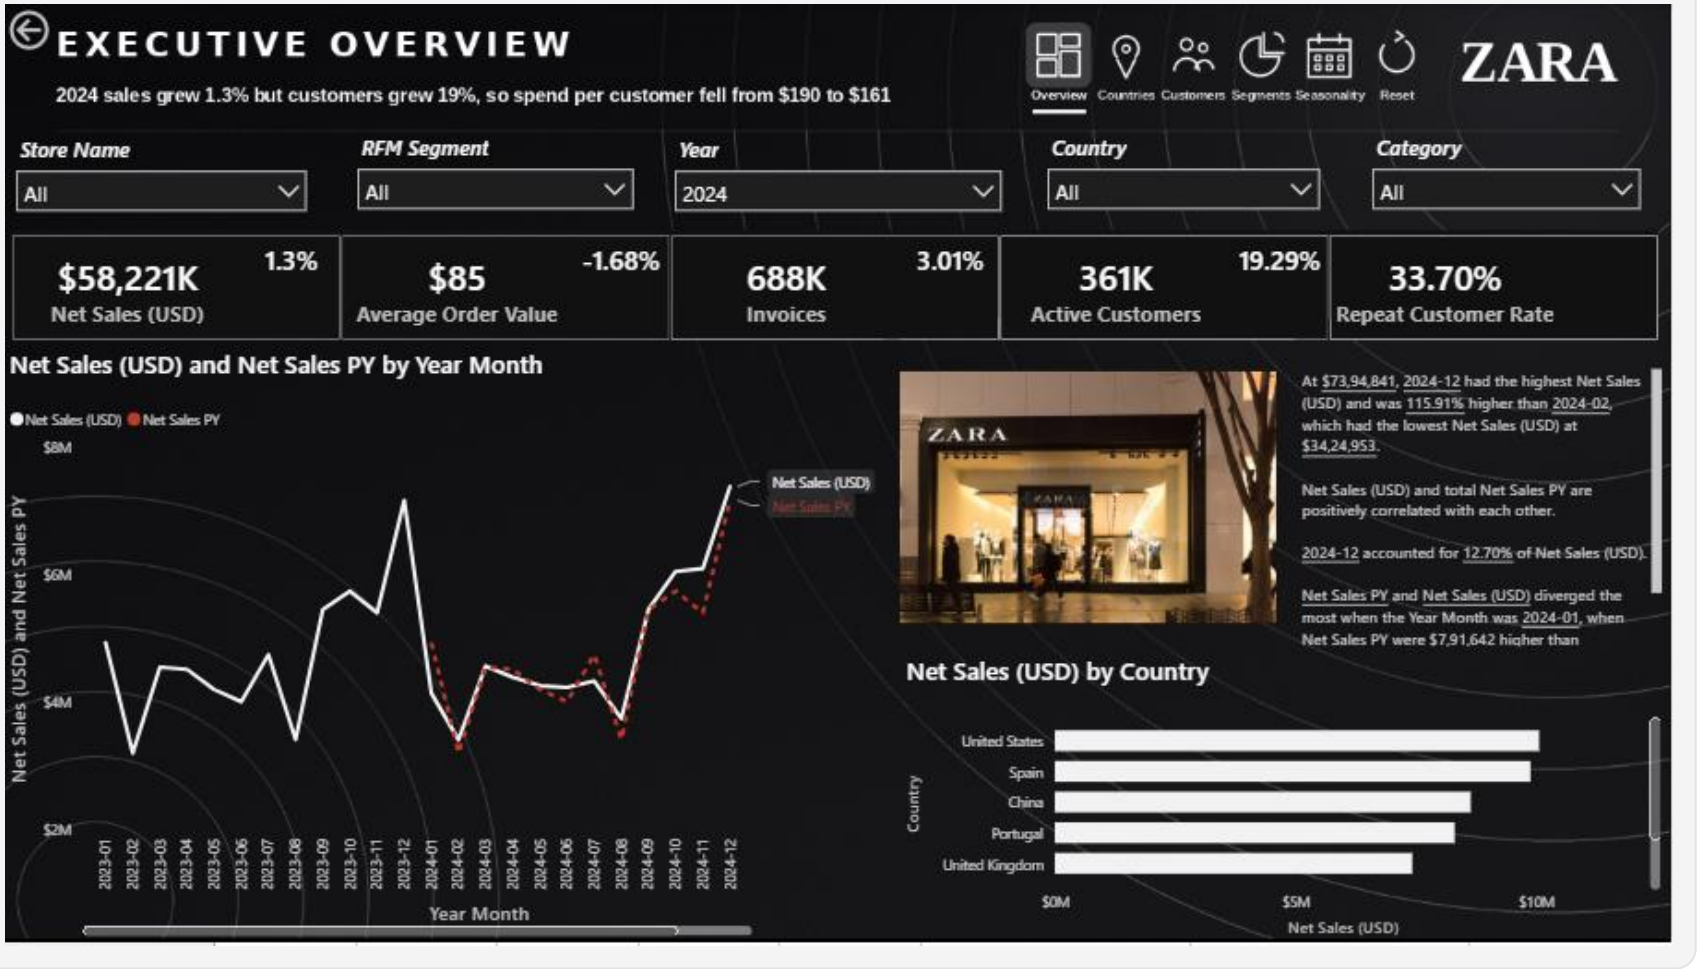

Page	Brief: must show	Business questions answered	Slides
1. Executive overview	KPI cards with YoY change, sales trend, AI summary	Q1 Growth	4-5
2. Countries and stores	Map of stores, country comparison, store league table	Q1 Growth by country and store	6-7
3. Customers and cohorts	New vs returning trend, cohort retention matrix	Q2 New vs returning, Q3 Cohorts, Q4 Sale-season customers	8-9
4. Segments and demographics	RFM segments, category mix by gender and age band	Q5 RFM and top 20%, Q6 Who buys what	10-11
5. Seasonality and payments	Month x weekday heatmap, payment mix, tourist share	Q7 Tourists, Q8 When and how people pay	12-13

- Slicers for year, country, store, category and RFM segment, synced across all pages, with navigation icons and a Reset button.
- Drill-through from a country to its stores; tooltips show net sales, invoices and average order value together.
- Star schema: transactions fact table with customers, products, stores, employees and a Date table; 2025 compared only with 1 Jan - 18 Mar 2024.

Page 1: Executive overview

Brief: KPI cards with YoY change, sales trend and an AI-generated summary

ZARA

2024: customers grew 19%, but sales grew only 1.3%

What page 1 (Executive overview) shows

+1.3%

Net sales $58.2M in 2024. Invoices +3.0%, average order value -1.7%.

+19.3%

Active customers, up to 361K.

$190 → $161

Spend per customer fell from 2023 to 2024.

US ≈ Spain

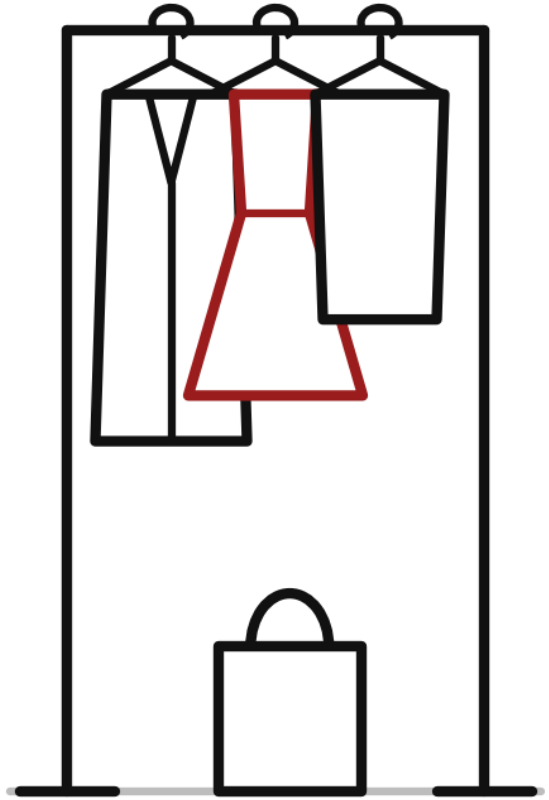

The US ($10.05M) has caught up with Spain ($10.09M), the home market.

TAKEAWAY **Zara is winning more customers, but each spends less: bring them back.**

Page 2: Countries and stores

Brief: Map of stores, country comparison and store league table

ZARA

The US is growing fastest; China and Germany are shrinking

What page 2 (Countries and stores) shows

+14.9%

US growth in 2024, the fastest. UK +6.3%, Portugal +2.8%, Spain +2.3%.

-12.4%

China in 2024. Germany fell 3.5%.

$3.47M

Chiado (Lisbon), the top store of 2024. The biggest map bubbles are the city flagships.

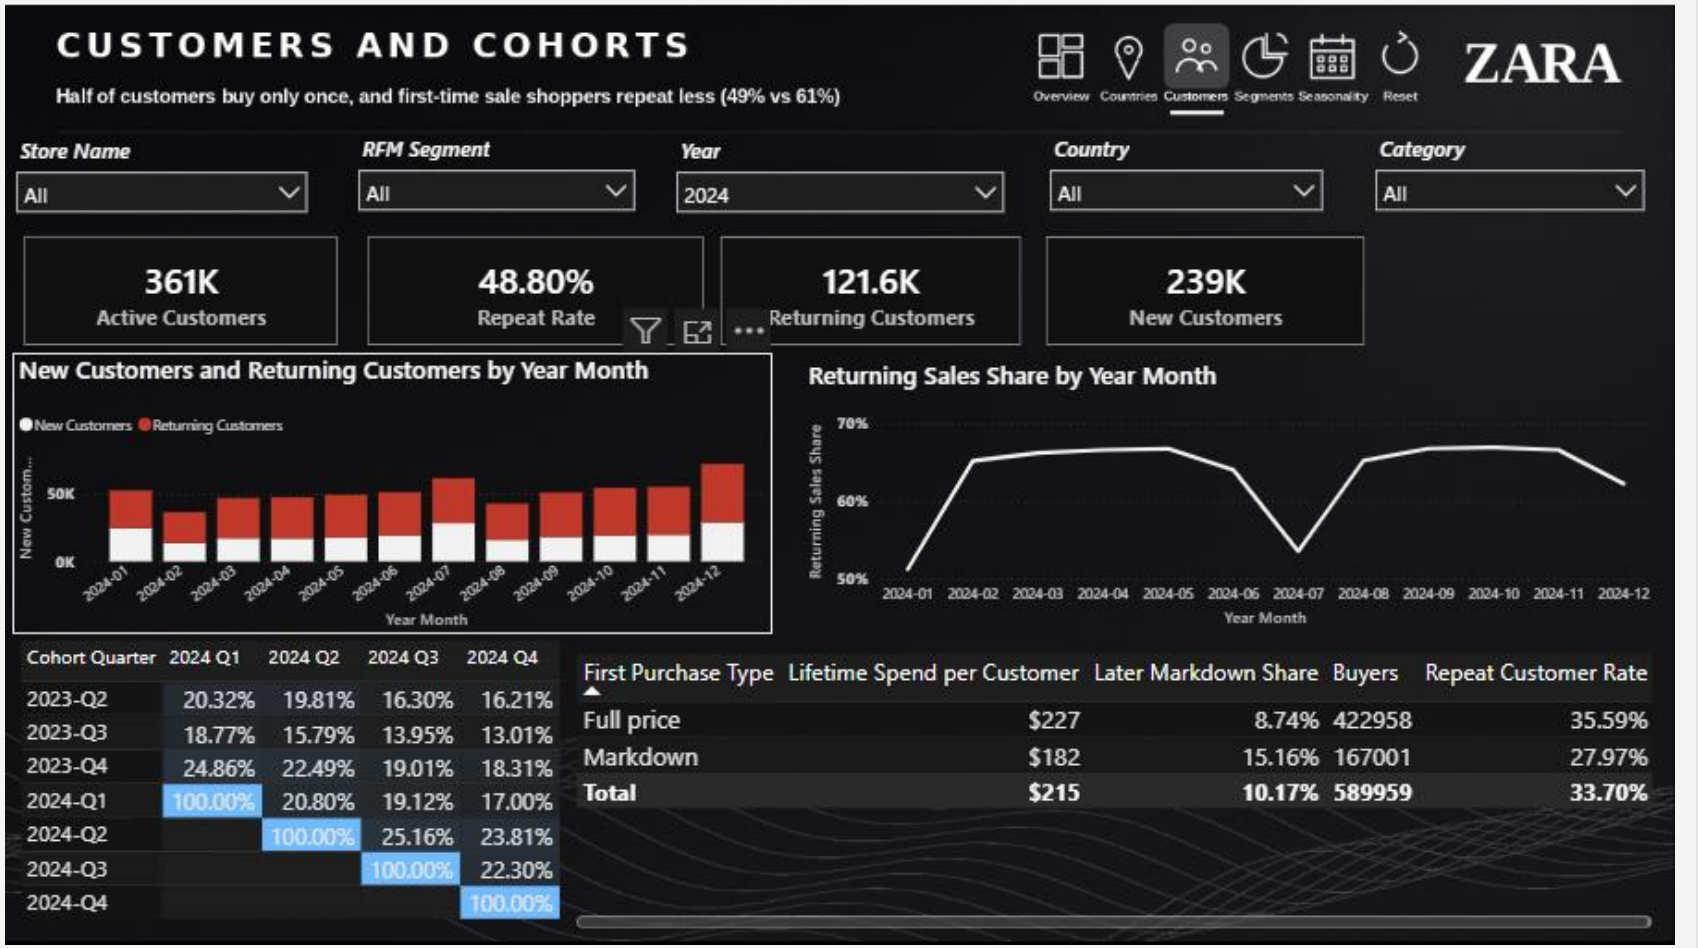

11.2%

of 2024 sales value came back as returns.

TAKEAWAY **Invest in the US, UK and Portugal; fix spend per customer in China first.**

Page 3: Customers and cohorts

Brief: New vs returning trend and cohort retention matrix

ZARA

Half of customers buy once; sale-season first-timers come back least

What page 3 (Customers and cohorts) shows

239K

new customers in 2024, arriving in waves in January, July and December.

2 in 3

dollars of monthly sales come from returning customers, dipping to about half in sale months.

1 in 4

first-time buyers buy again the next quarter; 2024 cohorts hold less than 2023's.

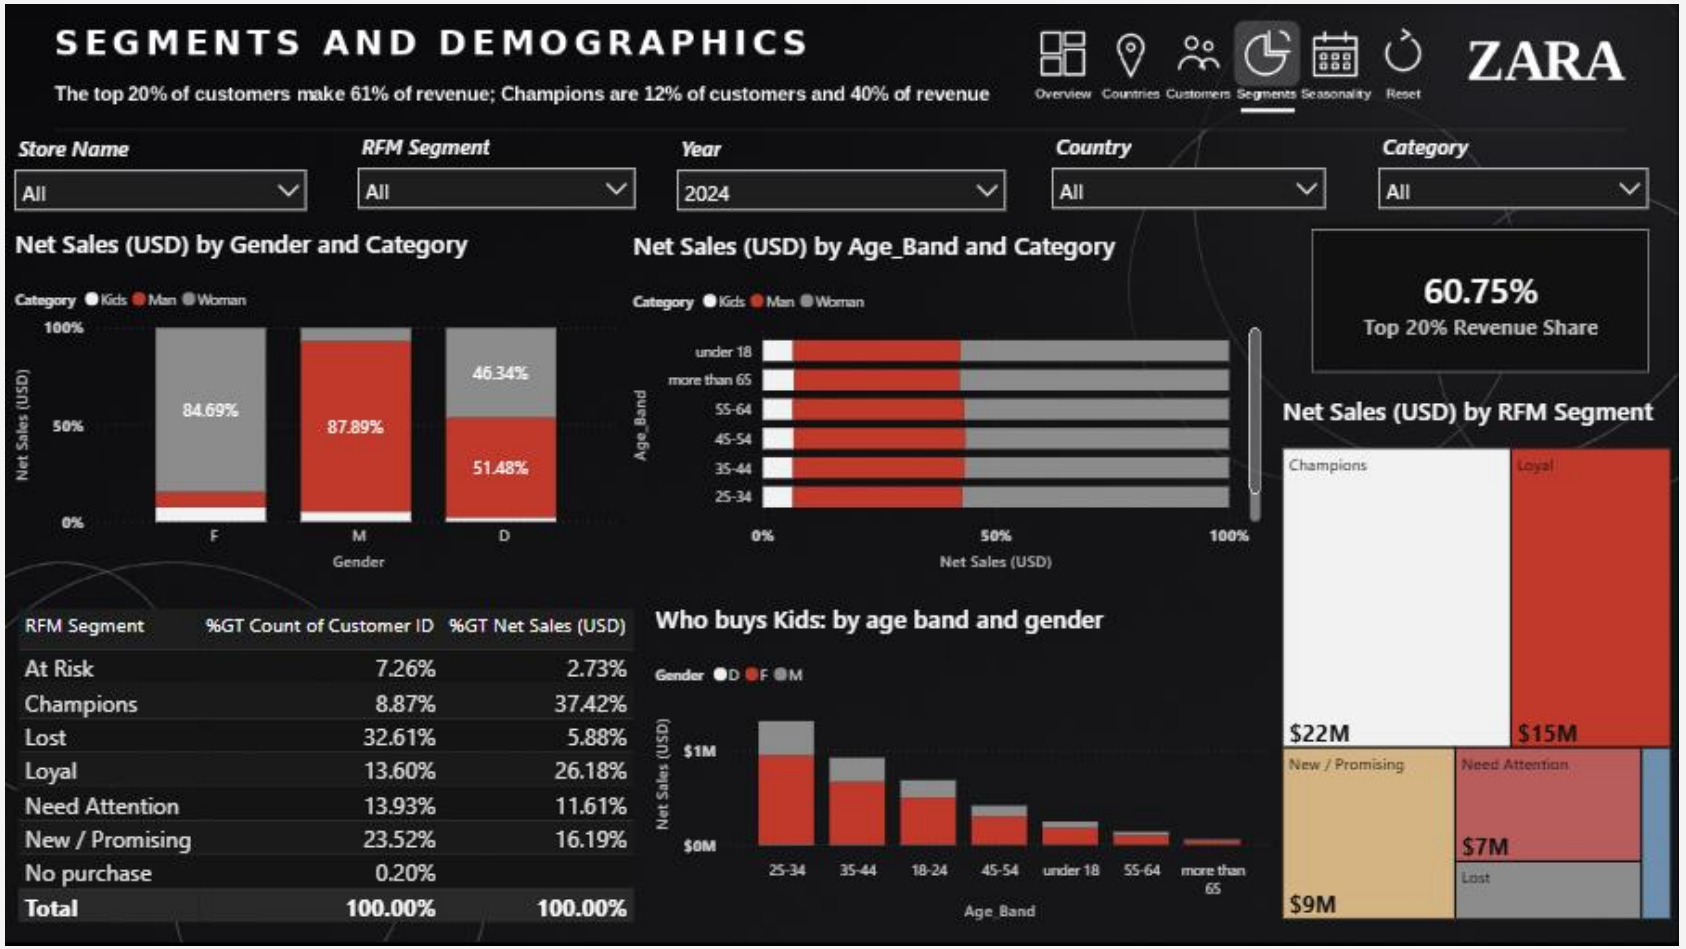

49% vs 61%

repeat rate when the first buy was on markdown vs at full price.

TAKEAWAY **Target sale-season first-timers with a reason to return at full price.**

Page 4: Segments and demographics

Brief: RFM segments and category mix by gender and age band

ZARA

A fifth of customers bring three-fifths of revenue

What page 4 (Segments and demographics) shows

60.8%

of revenue comes from the top 20% of customers.

9% → 35%

Champions are 9% of customers but bring about 35% of revenue. At Risk are the win-back target.

85% / 88%

of women's spend is on Woman and of men's on Man. The mix is the same in every age band.

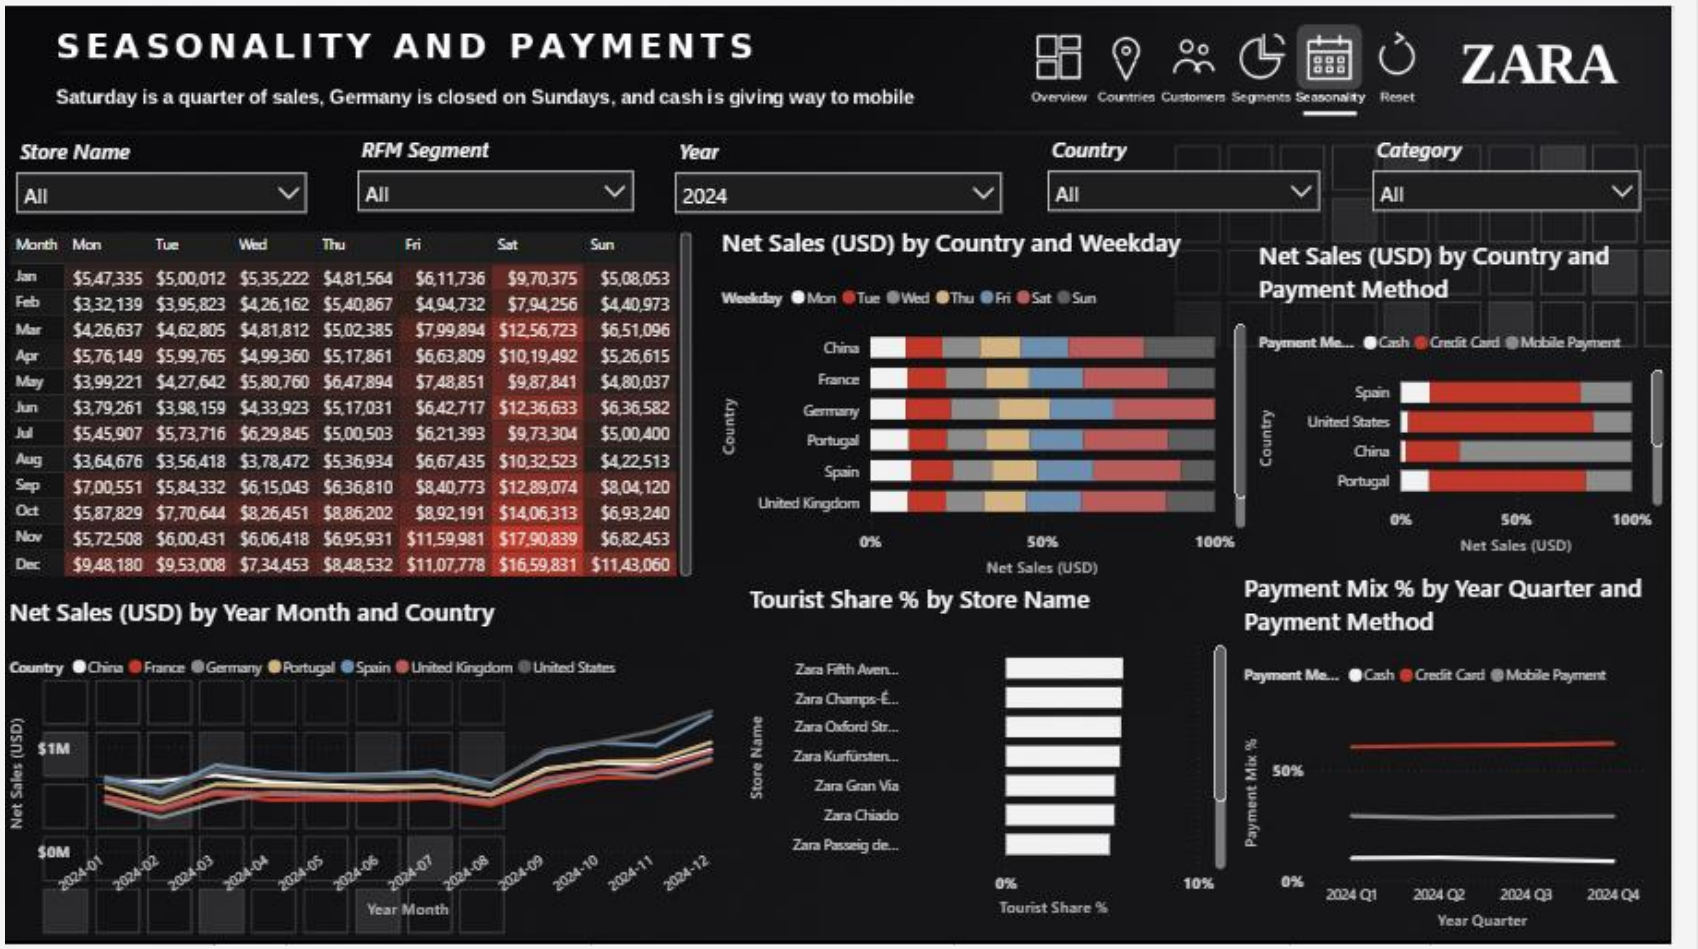

72%

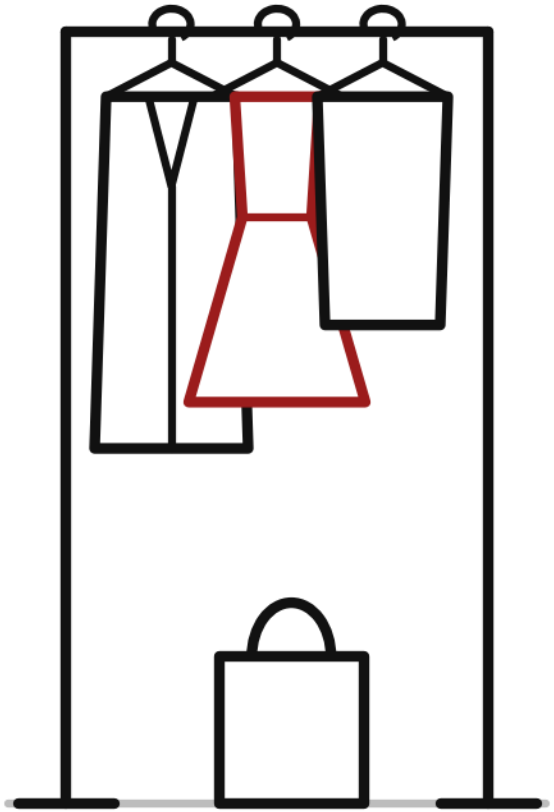

of Kids sales are bought by women; 25-34 is the biggest age band.

TAKEAWAY **Protect Champions with early access, win back At Risk, aim Kids at women.**

Page 5: Seasonality and payments

Brief: Month x weekday heatmap, payment mix by country and over time, tourist share by store

ZARA

Saturdays, December and mobile payments shape the business

What page 5 (Seasonality and payments) shows

22-29%

of weekly sales happen on Saturday. German stores close on Sundays; China's Sunday is almost as big as Saturday.

74%

of China's sales are paid by mobile; the US pays 80% by card, Germany 32% in cash.

13% → 8%

cash share of sales from 2023 to 2025; mobile keeps rising.

5-6%

of sales come from tourists, and only in the 8 flagships.

TAKEAWAY **Staff for Saturdays and December; plan tills for mobile payment outside Germany.**
